

The Monmouth County Planning Board's Environmental Council presents an Energy Forum:

“Making Choices Today for Energy Efficiency”

What can we do to ensure a sustainable energy future for Monmouth County? What resources are available to municipalities for renewable energy projects? Representatives from New Jersey's Clean Energy Program and New Jersey Natural Gas will address the opportunities offered to businesses, municipalities and residents for sound financial and environmental decision making. Topics of discussion will include teaching energy benchmarking in public schools, comprehensive design, construction and use of public buildings and the residential energy efficiency programs for homeowners.
